02nd July 2013.

To whom it may concern....

GFM provided a turnkey solution for a redesigned line layout of one of our key production lines at the Rugby manufacturing site. The project had to be completed within a tight shutdown window and required a vertical start up post modifications. This was achieved with minimal fuss and without any production delays. The project was competently managed and delivered against all of the sites requirements. I would have no hesitation about using GFM to manage other mid to large scale projects across our production sites.

Yours Sincerely,
Calvin Winch
